

TODD CREEK VILLAGE

METROPOLITAN DISTRICT

Proud to be your area water provider

Meet Christopher "Chris" Cobbley, Water Treatment Plant Manager

The Todd Creek Village Metropolitan District is excited to introduce you to our new Water Treatment Plant Manager, Chris Cobbley.

Chris began his career in water treatment in 2015 working for the City of Fort Morgan water treatment plant as a water operator. Over the next seven years he worked his way up to senior water operator. Then in 2022 an opportunity to try out a different career direction presented itself and Chris joined the team at Altitude Energy handling project controls. Nine months into the new career adventure Chris realized that his passion was really in water treatment and in December of last year he joined Todd Creek Village Metropolitan District as a treatment plant lead. With his experience, Chris was able to hit

the ground running and immediately impact our plant operations in a positive way, proving that he was a great hiring choice.

In May we promoted Chris to Water Treatment Plant Manager. He oversees and monitors the treatment plant, making necessary adjustments as needed to the treatment process to ensure that our water quality meets or exceeds all regulatory requirements. Chris currently holds a Class A Water Treatment Operator License and a Class D Industrial Wastewater License.

Chris is a Colorado Native, born and raised in Fort Morgan. He's been married for nine years, and he and his wife have two boys. When not working, Chris loves hanging out with his family, especially getting outdoors, camping and hunting. They are all sports fans and enjoy watching and attending games. Chris also plays in-line hockey on occasion when time allows.

Please join us in not only welcoming Chris to the team, but also congratulating him on his recent promotion!

Transparency Notice: Board meetings are held the second Thursday of each month at 2:00 pm via Zoom. The public is always welcome and encouraged to attend.
